**TOP MEDICAL AESTHETICS SCHOOL HELPS ARIZONA NURSES
BETTER THEIR EDUCATION AND ADD VALUE TO THEIR CAREERS**

*The Arizona Nurses Association Approves National Laser Institute to Provide Continuing
Education in
One of the Nation's Fastest Growing Health Industries*

The Arizona Nurses Association has announced that it has authorized National Laser Institute (NLI) – one of the nation's foremost medical aesthetics educators - to provide weekly, as well as weekend, continuing education courses for nurses. Classes include training on the most in-demand laser, intense pulse light (IPL) and injectable cosmetic treatments available.

According to *Aesthetics Buyers Guide*, over 30 million hair removal, skin rejuvenation, tattoo removal and other laser and intense pulse light (IPL) procedures were performed in the last year in the United States, earning more than 8.5 billion dollars. With the demand for trained professionals skyrocketing, National Laser Institute (NLI) has risen to the head of the class in the world of cosmetic procedure training and continuing education for nurses.

From Botox® and Restylane® to laser hair removal and photo facial rejuvenation treatments, nurses are following the industry's biggest trend by learning how to perform a variety of these in-demand cosmetic procedures. NLI offers flexible weekly and weekend courses to fit any schedule, covering advanced injectable and laser services. Students now have the option of attending the institute's 10,000 square foot facility in beautiful Scottsdale, Arizona, as well as the brand-new Las Vegas, Nevada campus.

As one of the few schools in the country with an on-site retail spa, students not only learn the necessary skills to operate safely but also have the opportunity to practice their techniques on real patients. Dr. Betty

Davis and Dr. Sasha Jazayeri, two of the industry's finest dermatologists, bring their years of professional experience and knowledge to the learning process. Their first-class teaching style, combined with small class sizes, offers a one-of-a-kind hands-on education.

The unique, personalized approach offered by NLI has received rave reviews from its graduates. "First of all the school is great. Top-notch physicians and nurses teach the classes, and there is a lot of hands on time - which is most important. I highly recommend the class. I feel attending the class was a very worthwhile investment and I plan to attend other classes there in the future," said Rosie Brkic, RN.

The increase in income nurses gain by being able to provide these services is only one of the many benefits gained through participation in the comprehensive courses offered at NLI. The Arizona Nurses Association recently approved NLI to offer graduates up to 102 contact hours of nursing continuing education upon completion of training.

Scholarships offered to Arizona nurses have allowed many, who would not have been able to attend school otherwise, to better their lives and the lives of their families through their education at the institute. NLI is also collaborating with several local charities to raise funds and awareness for groups that make a difference in Arizona.

About National Laser Institute

National Laser Institute was founded in 2003 and is committed to providing the most extensive and comprehensive medical aesthetic and laser training program in the country. Headquartered in Scottsdale, Arizona with a new location in Las Vegas, Nevada, NLI is also expanding to Dallas, San Francisco, Chicago, New York and Toronto over the next two years.
